

**International Symposium
on Coastal and Offshore Geotechnics
(ISCOG 2017)**

&

**International Conference on Geo-
Energy and Geo-Environment
(GeGe2017)**

5-7 July, 2017

**Zhejiang University
Hangzhou, China**

Dear Friends and Colleagues,

Two crucial global challenges facing the 21st century are exploration of energy (including offshore wind and deep-water methane hydrate) and management of geo-environment, both of which are essential for building a sustainable future. To provide a platform for sharing scientific breakthroughs in sustainable geotechnical solutions to energy production and geo-environment management, Zhejiang University has successfully organized the 1st International Symposium on Coastal and Offshore Geotechnics (**ISCOG 2012**) in Hangzhou, and jointly organized the 1st International Conference on Geo-Energy and Geo-Environment (**GeGe2015**) with the Hong Kong University of Science and Technology. Considering the two international conferences are highly complementary, we are arranging the 2nd **ISCOG & GeGe** events in parallel in 2017 at Zhejiang University (China), with the specific aim of enhancing multi-disciplinary interactions in the areas related to energy and geo-environment management. In the combined event (**ISCOG2017 & GeGe2017**), two parallel programmes will be offered, but also with substantial common plenary sessions and keynotes by prominent speakers. The presentations will include a re-run of the 2016 Rankine Lecture by Professor Richard Jardine from Imperial College.

On behalf of the organizing committee, I cordially invite academics and practitioners to participate the combined conferences of **ISCOG2017 & GeGe2017**, to share their scientific knowledge, breakthroughs, and innovations for building a sustainable future.

Our joint conference is supported by the International Society of Soil Mechanics and Geotechnical Engineering (ISSMGE) and Zhejiang Provincial Natural Science Foundation.

We are welcoming you in 2017 to Hangzhou, which is one of the most beautiful cities in Asia.

Lizhong WANG

Professor in Offshore Geotechnics
Executive Dean of College of Graduate School
Zhejiang University, China

Key Dates

May 25th, 2017

Deadline for extended abstract

Themes for ISCOG 2017

All the aspects of costal and offshore geotechnics, including for example:

- 1) Characterization and mechanics of marine sediments
- 2) Foundations for renewable and other energy facilities
- 3) Anchoring systems
- 4) Pipeline geotechnics
- 5) Marine geophysics and geology
- 6) Marine geohazard risk assessment and mitigation
- 7) Deepwater landslide mechanics

Themes for GeGe 2017

All the aspects of Geo-energy and Geo-environmental management, including for example:

- 1) Energy geo-structures such as piles, walls and tunnels
- 2) Carbon capture and storage
- 3) Radioactive waste disposal
- 4) Unconventional and geothermal energy
- 5) Reused and recycled materials in geotechnical engineering
- 6) Bio-geotechnology such as the use of vegetation and bacteria
- 7) Landfill engineering

* Elsevier Author Workshop

Time: 16:00-17:00 on 5th July.

Location: Anzhong building in Zijingang campus.

In the workshop, Professor Lyesse Laloui (Editor of Geomechanics for Energy and the Environment) and Miss Tracy Chen (Publisher, Ocean & Geotechnical Engineering, STM Journals, Elsevier) will be kindly present the following two subjects:

- “How to publish a paper” (45 min), by Professor Lyesse Laloui;
- “Updates in geotechnical engineering journals” (15 min), by Miss Tracy Chen

Limited seats will be offered on first-come-first-served basis.

If you are interested in this workshop, please register via the following link as soon as possible:
